

PrepPilot — /predict Workflow

Inference with schema validation & auto pipeline replay

LANE 1

HTTP · API

Next.js → FastAPI

LANE 2

STORAGE

joblib.load · metadata

LANE 3

VALIDATION

schema check

raw vs engineered

encoder col dtype

LANE 4

PIPELINE

replay if raw input

LANE 5

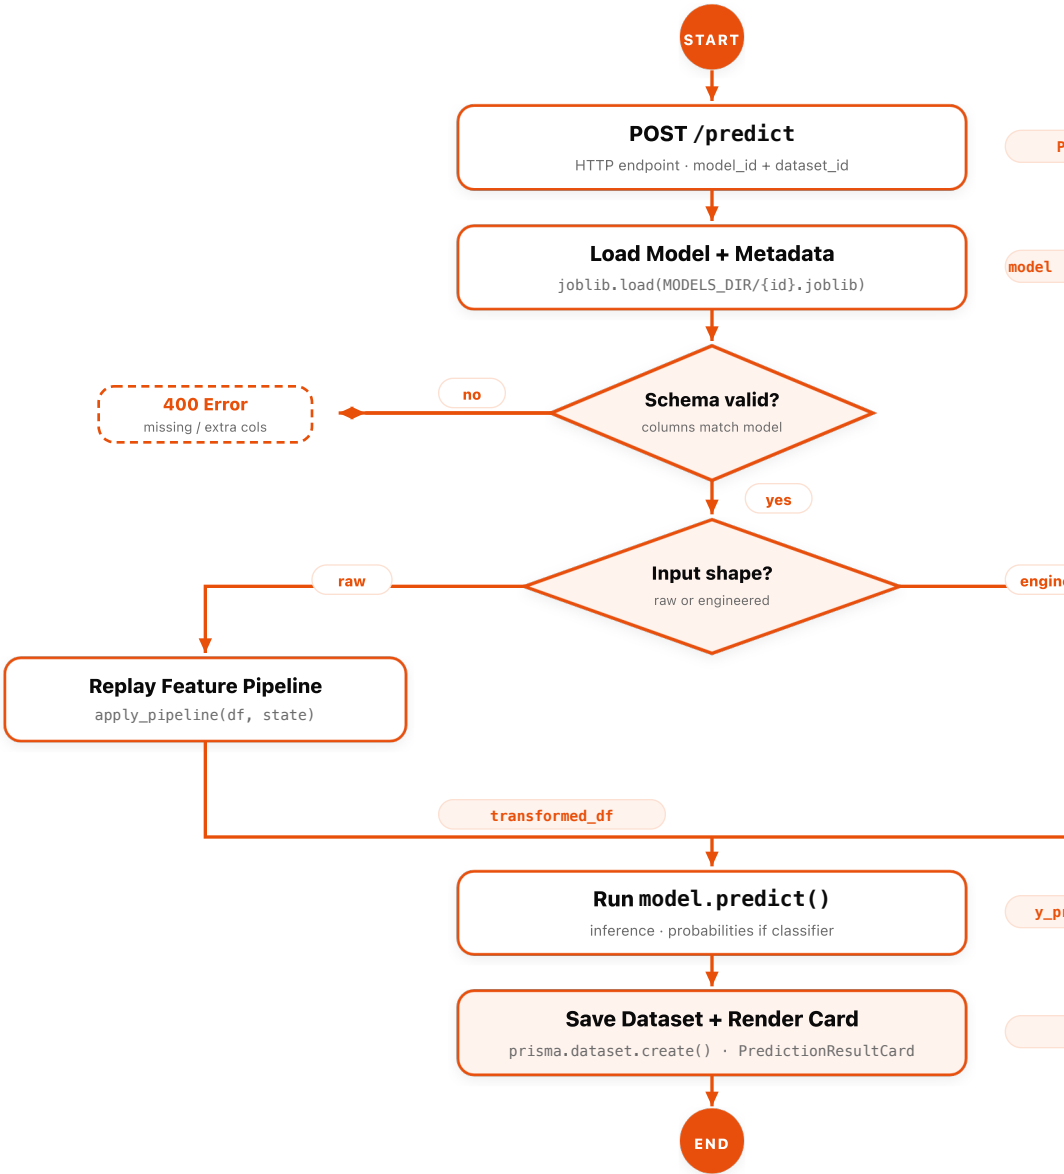

INFERENCE

model.predict(X)

LANE 6

PERSIST + RENDER

save dataset · card

● Start / End event □ Process step ◇ Decision (gateway) ▤ Error / exception path ➡ Sequence flow ○ Data object / payload
