

PrepPilot — System Architecture

Three-tier overview · who talks to whom · what protocol

CLIENT

APPLICATION

SERVICES

Architecture summary

THIN-PROXY PATTERN

Frontend forwards data only
ML logic lives in Python
TypeScript never runs models

STATELESS BACKEND

Per-request execution
Active dataset in payload
Models on persistent disk

MULTI-PROVIDER LLM

Anthropic + OpenAI
User picks model per turn
Default: claude-haiku-4-5
